Hey Enrique – the meeting with Penny went fine ... I gave a short update on the work Superfund is doing assessing the situation at Autumnwood (Wildomar), conveying info John and Wayne had provided. One of Penny's associates gave an overview of Ag Park ... I think their bigger concern is potential site contamination from the previous military uses of the site, not just the PCB-contaminated sewage spill. At their request I'm going to provide them with the contact info for the FUDS manager at the LA District Corps of Engineers.

Penny seems to be working on developing a good working relationship with Barbara Lee – they're taking her on a tour of Ag Park, to an industrialized EJ corridor in Pomona, and some other sites in the Inland Empire in a couple of weeks. In my comments, I tried to include a subtle message about how thinly stretched our resources are, and I got the impression Penny understands and appreciates that.

Thanks, Enrique – I'll be with Penny on Wednesday for the Inland Valley Task Force meeting and I anticipate she'll bring up this issue. If there are any updates before then that I can share with her, please let me know.

**Subject:** FW: Riverside Ag Park response letter

Jared:

Here is a draft of a response to the letter Penny Newman's organization recently sent to you and others about the imminent development of a parcel in Riverside and their concerns about lingering contamination issues. We've coordinated with Land Division on this response which provides some information on some previous engagement (2011) by EPA Land Division on the PCB clean-up plan.

Also, think about delegating it to me as the signatory.

Happy to discuss after SMT if you would like and Jeff could join us.

Enrique

Hi Enrique-

Attached is the response letter to Penny Newman regarding Riverside Ag Park. I've attached the memo sent by CCAEJ and the memo to file written by RCRA program that is referenced in the response letter.

Let me know whether you'd like me to edit further.

Thanks,

Nicole
